-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 8, 9, 16 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Flurry et al (5,455,958 hereinafter “Flurry”).

Flurry teaches an apparatus (Fig. 1) for managing a graphics display (12) associated with an embedded system (CPU 10), said graphics display accessibly by at least a first and a second application program (14/16, 18 and 20) executable by said embedded system, said apparatus comprising a graphics resource manager (RCM 22) executable by said embedded system; wherein said graphics resource manager is configured to prevent simultaneous access of said graphics display by said application programs (col. 4, lines 52-65). Therefore, at least claims 1, 8, 9, 16 and 23 are anticipated by Flurry.

### ***Allowable Subject Matter***

3. Claims 2-7, 10-15, 17-22 and 24-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specially, the prior art fails to suggest or teach, in combination with the remaining elements and/or steps, said embedded system including programming for carrying out the operations of displaying an on-screen display; selecting the first application via the on-screen display; existing the on-screen display when the first application is selected; and sending a message to the graphics resource manager to start the first application program when the first application program is selected as recited in claim 1 and similarly recited in claims 10, 11, 17 and 24.
